PCA3 REQUISITION FORM

Please fill in the forms

Physician

Name & Surname:

Institution:

Address:

Telephone:

E-mail:

Physicians Stamp and Signature

Patient

Sample date:

Name & Surname:

Date of Birth (dd/mm/yyyy): / /

Address:

Telephone:

E-mail:

PCA3

Information:

The PCA3 is a highly specific genetic test to improve the diagnosis of the Prostate Cancer. Messenger RNA (mRNA) of the PCA3 gene is highly over-expressed (median 66-fold) in >95% of PCa tissue compared to normal or benign Prostate tissue. The PCA3 assay is not only Prostate specific but also Prostate Cancer specific. Using Real-time rt-PCR, PCA3 and PSA mRNA molecules are amplified and the PCA3 score is calculated. The PCA3 score can be used with other clinical features and identify patients who have a high probability of having Prostate Cancer.
